Postal Zone Rules

Lyngpakke AS | Owner: Pricing team | Version 2026.1 | Effective 1 January 2026

These rules decide which zone multiplier applies to a parcel. Each rule has a number so it can be referred to in pricing decisions and support cases.

Rule Z-1. Zones by postal code

Postal codes	Zone
0000–1999	A
2000–4999	B
5000–7999	C
8000–9999	D

Rule Z-2. Island exceptions

Some postal codes are on islands without a road connection, even though their number falls in Zone B or C. These postal codes are always priced as Zone D: 4985, 4986, 6995 and 7994. This exception overrides Rule Z-1.

Rule Z-3. Sender and receiver in different zones

The zone is found for both the sender postal code and the receiver postal code. When they differ, the higher zone applies. For example, a parcel from Zone A to Zone C is priced as Zone C.

Rule Z-4. Pickup point and home delivery

Zone multipliers apply to both pickup point delivery and home delivery. Home delivery also adds the fixed home delivery fee of 49 NOK. The fee is not affected by the zone multiplier, because fixed fees are added after the multiplier.

Rule Z-5. When zone changes take effect

Changes to zones or to the list of island exceptions only take effect on 1 January or 1 July. A change agreed on any other date waits until the next of these dates.

Rule Z-6. Unknown postal codes

If a postal code cannot be found, the booking is rejected with an error. The engine must never guess a zone.
